

José Antonio Vega García

SYSTEMS ENGINEER / SCRUM MASTER / DATA SCIENTIST
ERP SR CONSULTOR/ SOFTWARE DEVELOPER

Profile

Solution-oriented Systems Engineer dedicated to ensuring optimal technology function within complex, high-needs environments. Strong communications skills, able to partner with non-technical leaders to define core business needs, shape technical recommendations, and design/implement innovative systems tailored to unique business needs.

Highly skilled and versatile professional with expertise spanning across System Administration, Data Science, Scrum Master, Software Development, Project Management, Database Administration (DBA), and ERP consulting. Adept at managing complex, high-demand projects, designing innovative technological solutions, and leading cross-functional teams to deliver impactful results. A proven track record in optimizing business processes through the integration of data-driven decision-making and cutting-edge technology.

Employment History

Financial Data Scientist, Vegacero, CDMX

NOVEMBER 2017 – DECEMBER 2024

- Strategic role responsible for utilizing data science techniques to extract, analyze, and present (ETL) financial and sales data in meaningful ways to support decision-making at the highest levels. This individual will be integral to improving existing systems, enhancing data-driven processes, and ensuring accurate reporting for senior leadership. The role focuses on streamlining operations related to databases (SQL), developing dashboards, managing ERP (SAP) systems, and overseeing a data team.
- Spearheaded cross-functional team to streamline organizational processes, resulting in a 50% increase in efficiency and cost savings.
- Established and maintained strong relationships with key stakeholders, fostering a collaborative and productive work environment.
- Developed and implemented ERP (SAP) and Web applications to drive business growth and achieve objectives in different areas.
- Oversaw IT budget planning and resource allocation to ensure optimal utilization of company resources.

IT Manager, Parts Shop Electronics, Tlalnepantla

AUGUST 2010 – NOVEMBER 2017

- ERP migration (Totvs – Oracle), implementation, training, and database administration.
- Data Base and Linux Administrator.
- Developed IT policies, department organization, and technology asset management.
- Ensured data security and compliance with industry standards.
- Leading IT team (9 people), ensuring data security, and overseeing multi-store operations all over Mexican republic.
- Proven ability to drive digital transformation and enhance business efficiency through strategic IT initiatives.
- Oversaw inventory of key IT assets, tracking asset usage.
- Conducted equipment and systems testing, uncovering issues for immediate remediation.
- Shaped and led planned/unplanned maintenance activities.
- Development of a mobile application to share information between the ERP and CRM system.
